

Integrated MS-Ph.D Scholarship for Spring Semester

Gachon University, South Korea

(https://ai-security.github.io/index_e.htm)

We are currently offering fully funded ***Integrated MS-Ph.D scholarship*** for Spring semester (starting March 1, 2027) to outstanding students at the Department of IT Convergence Engineering, Gachon University, South Korea. We are seeking Integrated MS-Ph.D Program aspirants that would be highly motivated and committed to high quality research aimed at top-tier venues (particularly top-tier conferences). Applicants with high-impact conference or journal publications (if any) will be given preference. The details of financial support are given below.

- **Support for Integrated MS-PhD students:**
 - Full tuition fee
 - Monthly Stipend
 - **Paper incentives based on performance**
- **Privilege for Integrated MS-PhD students:**
 - **Collaborative research with top-tier schools** and/or internships at big tech companies during the course
 - Appointed as an **assistant professor at Gachon University** after obtaining degrees

The language proficiency requirements the students should meet include the following language certificates with test scores of at least:

- TOEFL PBT 530, CBT 197, iBT 71
- IELTS 5.5
- TEPS 600/ NEW TEPS 326

The major areas we are currently pursuing include, but are not limited to:

- **AI-Integrated Cybersecurity**
- **Artificial Intelligence**

The applicants **MUST** have:

- **A GPA of 3.4 or above out of 4.0 is required** for the Computer, Electrical, or Electronic Engineering undergraduate program. Applicants from a different program but with strong mathematical background and motivation in AI will also be considered.
- Strong motivation in continual learning in the above-mentioned research areas and a strong commitment & dedication mindset towards research are highly valued and desired.
- Development exposure (preferably in Python, including the ability to develop, manage and integrate own and external code/codebases/repos, etc) is desired & preferable, but not the top priority any more as AI has made code development easy. Instead, strong theoretical foundations and transferable skills like problem identification, problem framing & ideation are more priority now and will be evaluated.

Applicants are required to **send emails** with their **resumes (including academic transcripts and publication records (if any))** to muhammadtalal.f@gmail.com
